Dr. David Allen is the Melvin H. Gertz Regents Chair in Chemical Engineering and the Director of the Center for Energy and Environmental Resources at the University of Texas at Austin. For the past two decades he has performed research on air quality and pollution prevention; he is the author of four books and over 175 scientific papers in these areas. He has received awards honoring his work from the National Science Foundation (the Presidential Young Investigator Award), the AT&T Foundation (an Industrial Ecology Fellowship), the American Institute of Chemical Engineers (the Cecil Award for contributions to environmental engineering), and the State of Texas (the Governor's Environmental Excellence Award).

Dr. Allen has led, or helped to lead, multiple air quality field studies in Texas. His current research at the University of Texas uses the results of these air quality science programs to help inform air quality management decisions in Texas.

Dr. Allen also serves on state and national committees that advise government agencies on the use of scientific and technical analyses in environmental management decisions. He has served on the National Research Council's Board of Environmental Studies and Toxicology; he serves on the U.S. Environmental Protection Agency's Science Advisory Board, and he chaired the Texas Council on Environmental Technology. In addition, Dr. Allen is actively involved in developing Green Engineering educational materials for the chemical engineering curriculum. His most recent effort is a textbook on design of chemical processes and products, jointly developed with the U.S. EPA.

Dr. Allen received his B.S. degree in Chemical Engineering, with distinction, from Cornell University in 1979. His M.S. and Ph.D. degrees in Chemical Engineering were awarded by the California Institute of Technology in 1981 and 1983. He has held faculty appointments at UCLA and the University of Texas. He has held visiting positions at the University of California, Santa Barbara (UCSB) and the California Institute of Technology; he joined the University of Texas in 1995.
