

Comments from the Editors

This issue of CACHE News presents a summary of CACHE'S 40th Anniversary symposium, which was celebrated in August, 2009. One of the founders and original CACHE Executive Officer Larry Evans led off the presentations; Larry also was founder and CEO of Aspentech and the President of AIChE in 2008. Two sessions of interest to chemical engineering education are the next items and include papers in a session on distributed process control at the 2009 American Control Conference and presentations at the Centennial Design Education session at the 2008 AIChE meeting in Philadelphia. Four papers related to educational computing published in *Chemical Engineering Education* follow. Finally a paper by Dean of Engineering at Koc University, Yaman Arkun, reflects on how academic administration uses principles of process control. The issue concludes with short reports on three CACHE conferences held this past summer. FOCAPD 2009, FOMMS 2009, and FOSBE 2009.
