

Comments from the Editors

This issue of CACHE News contains a number of articles of computing interest published previously by Chemical Engineering Education. There are also two papers on Internet laboratories from the 2005 AIChE meeting and two papers from the Foundations of Systems Biology in Engineering (FOSBE) Conference one year ago. Other articles cover topics such as the activities to develop a virtual textbook on advanced control, ChemSep and CONSOL applications. We also have included a copy of the first CACHE Newsletter produced in 1971 (as a historical retrospective). One CACHE Conference is scheduled for later in 2006, which is FOMMS 2006.
