

Comments from the Editors

This issue of CACHE News features the presentation of the 2008 ASEE-CACHE Award winner, Bruce Finlayson. An overview of CACHE-sponsored activities is given in the eight presentations from the CACHE session at the 2008 AIChE meeting in Philadelphia. We also include presentations from the Process Control Centennial session at that meeting (featuring several leading academic researchers). A number of other papers on computer applications using MATLAB, LabVIEW, and Mathematica are in this issue. Thanks to Professor Ignacio Grossmann, the link to the virtual library for process systems engineering is in this issue. Biosketches on three new Trustees of CACHE Corporation follow. Finally, short articles and links to three CACHE conferences being held in Summer, 2009, conclude the issue.
