

Comments from the Editor

This issue of CACHE news features presentations by several recent award winners including Duncan Mellichamp (2010 ASEE-CACHE Award), and Michael Cutlip and Mordechai Shacham (AIChE Himmelblau Award). An article on a free subprogram for VBA created by E.M. Rosen and four articles reprinted with permission from *Chemical Engineering Education* follow.

Also in this issue is an overview of the AIChE Sessions on Simulation Based Engineering and Science (SBES), which took place at the AIChE Annual Meeting in Salt Lake City in November, 2010, as well as the papers from each session. Additionally, presentations from the CACHE Session at the AIChE Meeting are included.

Finally, CACHE welcomes three new trustees, Jim Davis, Rafique Gani, and Steve Zitney, but says goodbye to two who are stepping down, Venkat Venkatasubramanian and Dick LaRoche.
